10th June 2024

Refurbishment of Garden Benches.

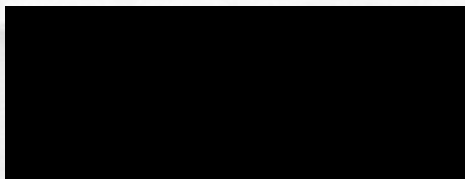

Please accept my grateful thanks for all your hard work recently completed on our four garden benches. The colours are bright and vivid which enhances the Hospital Garden and they are loved and used by both Patients and staff alike.

It is really beneficial to patients recovery and mental wellbeing when they can go outside and sit in the garden. The staff enjoy the "downtime" when they sit outside in the fresh air.

The benches are now a really positive part of the hospital garden and it is a joy to see them being used.

We the Friends of Inverurie Hospital believe if the current Mens Shed was able to expand its current facilities and building it would not only mean helping more local organisations but also supporting more men who undoubtedly benefit greatly from peer support thus enhancing their mental well-being.

There is no doubt in our minds that the Inverurie Mens Shed is a very valuable asset to our local community, helping to bring together a wide range of experience in our local area.
